The Genesis Chamber

The 'TRouBLe' Diagnostic Protocol

SUBJECT: CONGENITAL HEART DEFECTS (CHD)

NotebookLM

TROUBLE
NO TROUBLE
TROUBLE
NO TROUBLE
// BINARY PROTOCOL //
1. A CHD is either TRouBLe or No TRouBLe.
2. There is no in-between.
3. Diagnosis dictates Destiny.
NotebookLM

TRouBle
T = Starts with “T”
R - L = Right to Left Shunt
B = Blue (Cyanotic)

NotebookLM

Tetralogy of Fallot

Truncus Arteriosus

Transposition of Great Vessels

Tricuspid Atresia

Totally Anomalous Pulmonary Vasculature

EXCEPTION DETECTED: Left Ventricular Hypoplastic Syndrome
(The hidden 'T' in disguise)

NotebookLM

CRITICAL FAILURE: R-to-L SHUNT

Unfiltered Fuel Enters Chassis

RESULT: CYANOTIC

NotebookLM

'B' IS FOR BLUE
- SURGERY: IMMEDIATE
- GROWTH: DELAYED / FAILURE TO THRIVE
- LIFESPAN: COMPROMISED
- FAMILY STATUS: GRIEF & FINANCIAL STRESS
- DISCHARGE: CARDIAC MONITOR REQUIRED

NotebookLM

SYSTEM NOMINAL: NO TROUBLE
CIPHER SCAN:
> First Letter: NOT 'T'
> Shunt Flow: Left → Right
> Color Status: Pink (Acyanotic)
> Prognosis: Normal Life Expectancy

NotebookLM

NO 'T' DETECTED
- SAFE CLASS
Patent Arteriosus (PDA)
entricular
eptal Defect
(VSD)
Patent Foramen Ovale
rial Septal Defect
Pu nonic
s nosis

NotebookLM

LAW 1:
THE MURMUR
LAW 2:
THE ECHOCARDIOGRAM
APPLIES TO ALL DEFECT CLASSES

NotebookLM

THE BEAST: TETRALOGY OF FALLOT

NotebookLM

PROVe

P - Pulmonary Stenosis

R - Right Hypertrophy

O - Overriding Aorta

V - Ventricular Septal Defect

e - (silent)

Do not analyze the pathology.
Recognize the components.

NotebookLM

TROUBLE

- Starts with ‘T’
- R → L Shunt
- Blue / Cyanotic
- ACTION: SURGERY

NO TROUBLE

- No ‘T’
- L → R Shunt
- Pink / Acyanotic
- ACTION: LIVE LIFE

UNIVERSAL REQ: Murmur + Echo

NotebookLM

THE FINAL EXCEPTION

Left Ventricular Hypoplastic Syndrome

Starts with L...

...But acts like a T.

STATUS: CRITICAL TROUBLE
